Value Exchange Corporation Announces Construction of State-of-the-Art Ops & Technology Center in Madison, Alabama – The VX TECH CENTER

NASHVILLE – Value Exchange Corporation is pleased to announce that in continuation with the company’s rapid growth and expansion, it has acquired the commercial property and recently completed “shell” building in the Phoenix Center Business Park in Madison, AL (a “hub” community of aero-space leader City of Huntsville). Construction to complete the 6,000 square foot center will begin immediately with a goal of being fully operational by mid-summer, 2009.

When completed, the multi-million dollar VX TECH CENTER will house the company’s primary client tele-sales and service functions, a telecommunications center, state-of-the-art teleconferencing capabilities, a redundant technology server environment and “Terminal Lab”, and several conference rooms, along with space for administrative offices and client reception.

“We’re very pleased with having been able to acquire this site in such a premier business location” said Damon Cummings, Executive Vice President & Chief Operating Officer, who will be responsible for both the construction and on-going activities of the center. Cummings concluded “by investing now in a new facility that leverages the latest in telecommunications and electronic processing technologies, the VX TECH CENTER will serve Value Exchange Corporation’s needs well into the next decade of growth”.
